

Tak for dit køb!

Tusind tak fordi du har valgt at købe et originalt Roon & Rahn-produkt! Du bidrager hermed til at realisere vores vision om at udvikle dynamisk og bæredygtigt design til mennesker, som sætter pris på ting der holder – både æstetisk og funktionelt.

Vi er drevet af en stærk passion for at skabe produkter "helt fra bunden". Produkter, hvor hver enkelt detalje og løsning er gennemtænkt, med det klare formål at opnå det ultimative resultat.

Sammen med vores stædige fokus på at gøre os umage med alt i hele processen, er denne passion med til at skabe produkter, der giver værdi de næste mange år! Vi håber, at du kan genkende vores vision og passion i det produkt, du nu står med i hånden.

Husk du altid kan følge med i alle de ting, vi går og laver, på Instagram: @roonrahn og facebook.com/roonrahn.

Del også meget gerne selv hvordan du bruger vores produkter, for at inspirere os og alle andre. Endnu engang tak!

Træ er et naturligt materiale

Dette produkt er lavet af massivt, europæisk egetræ. Træ er et levende materiale, der varierer i farvenuance, struktur og åretegning og påvirkes af bl.a. lys. Forskelle og variationer i farve og udtryk er med til at gøre hvert enkelt træprodukt unikt. Derfor kan det produkt, du har købt, godt afvige lidt fra det, du har set i butikken eller på billeder.

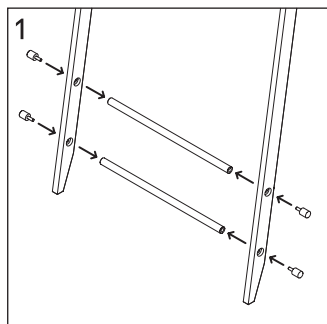

Træet er fortsat et levende materiale efter fældning og forarbejdning. Det påvirkes bl.a. af ændringer i luftfugtighed og temperatur, og vil udvide sig under fugtige forhold og trække sig sammen, når luften er tør. Det er helt naturlige processer og ikke udtryk for fejl i træet.

Håndlavet snedkerarbejde

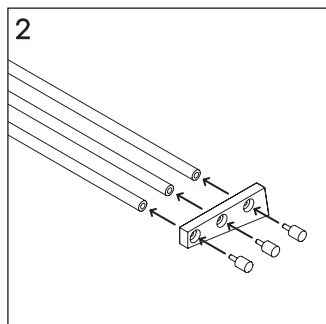

Alle vores produkter er snedkerhåndværk, hvor der er brugt lang tid på at sikre den bedst mulige finish på alle dele. Da alt er håndarbejde, kan der forekomme enkelte "fingermærker", pudsestøv og andre ubetydelige urenheder i træets overflade. De kan i langt de fleste tilfælde fjernes med en klud med sæbevand.

Træet har fået en let overfladebehandling med naturolie. Overfladen kan rengøres med overtørring med klud og almindeligt sæbevand. Kan evt. opfriskes med en egnet møbelolie. Vi anbefaler at teste olien et mindre synligt sted, inden hele fladen behandles, da olie reagerer forskelligt og kan medføre farveændringer i træet.

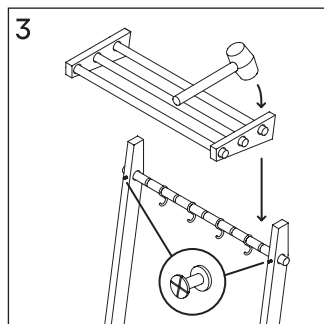

Monteringsvejledning

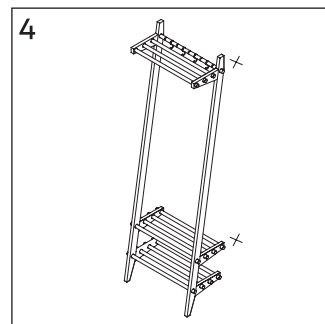

Saml rammen ved at skrue træskrueerne gennem hullerne i siderne og ind i gevindbøsningen i rundstokkene. Placer rundstokken med riller øverst.

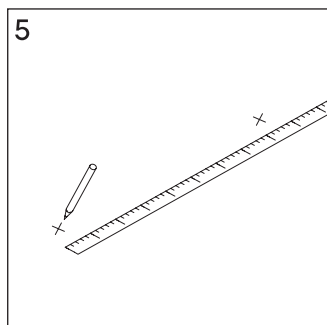

Saml tophylden og bundhylderne med samme fremgangsmåde som rammen. Bemærk at siderne til tophylden er anderledes end siderne til de to nederste hylder.

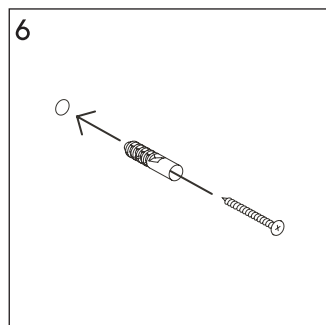

Monter hylderne ved at presse dem ned over beslagene. Brug en gummihammer til at få rundstokkene i vandret niveau. Anvend evt. alm. hammer og en træklods.

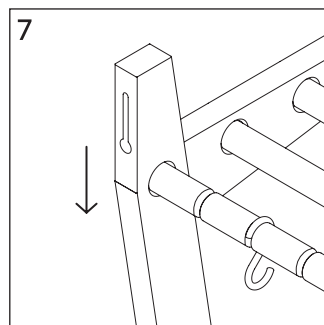

Placer Solo™ så toppen af rammen, samt midterste hyld hviler op mod væggen. Ønskes fastgørelse til væg, fortsæt til punkt 5.

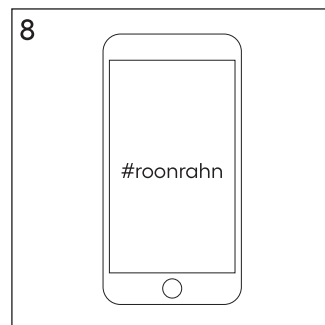

Afsæt markeringen med afstanden mellem centrum af monteringshullerne på bagsiden af rammen. Hullerne placeres 176 cm over gulvhøjde.

Bor hul ved de to markeringer. Indsæt rawplugs i de borede huller. Skru til sidst vedlagte skruer i hullerne.

Hægt de skjulte fræsninger i toppen af siderne ned over skruerne.

Del dit nye originale Roon & Rahn produkt med dine venner, og bliv samtidig inspireret af andre.

Thank you

Thank you very much for buying an original Roon & Rahn product! By supporting us you contribute to our vision of developing dynamic and sustainable design for people that appreciate things that last - both aesthetically and functionally.

We are driven by passion of making products from "scratch". Products where every single detail and solution is well thought out with the purpose of gaining the ultimate result.

Our stubborn focus on making an effort on every step of the process is the cradle to great products that continues to give value for many years! We hope you recognise our vision and passion in the product you now hold in your hand.

Remember, you can always follow what we are up to on Instagram: @roonrahn og facebook.com/roonrahn.

You can also share how you use our products, to inspire us og everybody else. Once again thank you very much!

Wood is a natural material

This product is constructed from solid European oak. Wood is a living material that varies in nuance, structure and grain, which is affected by light among other things. Differences and variations in color and expression makes each wood product unique. Because of these factors your new product may vary a bit from what you have seen in the store or on photos.

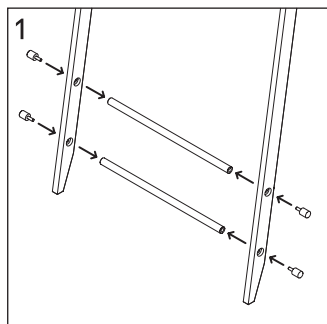

After harvesting and processing the wood continues to be a living material. It is affected by changes in temperature and humidity, which is why it will expand in a humid environment and retract when the air is dry. These are completely natural processes and not expressions of flaws in the wood.

Handmade fine carpentry

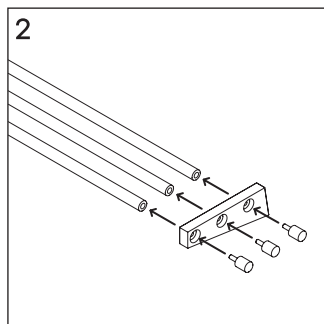

All of our products are handmade woodwork, where a lot of time and energy has been invested in each product to achieve the best possible finish on all parts of the product. Since everything is made by hand there can occur "finger marks", excess sanding dust and other insignificant impurities in the surface of the wood. In the far most cases these can be removed with a soap water soaked cloth.

The wood has been given a light surface treatment with natural oil. The surface can be cleaned by wiping with a cloth and ordinary soapy water. Can be refreshed with a suitable furniture oil. We recommend testing the oil on a less visible part of the product before treating the entire surface, as oil reacts differently and can cause color changes on the wood.

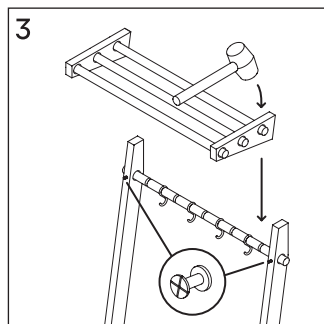

Mounting instruction

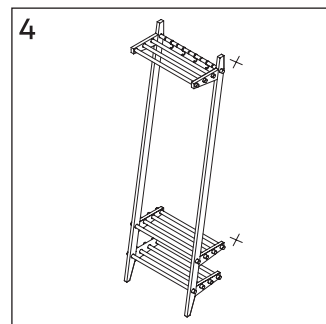

Assemble the frame by screwing the screws with wooden head through the holes of the sides and into the bushing of the oak rod. Place the rod with grooves in the top.

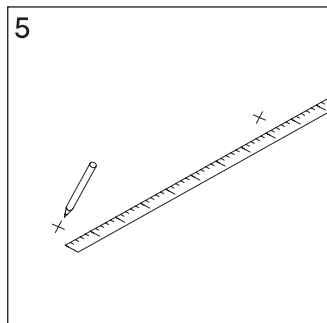

Assemble the top shelf and the bottom shelves the same way as the frame. Notice that the sides on the top shelf is different from the bottom shelves.

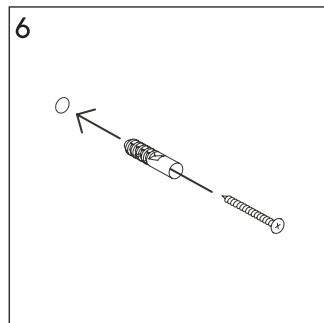

Mount the shelves by pressing them over the screws attached to the frame. Use a rubber mallet to fully position the shelves, so that all the rods are aligned.

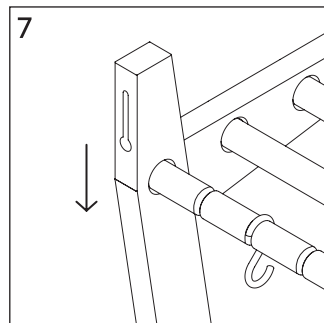

Place Solo™ so the top of the frame and the middle shelf rests up against the wall. If you want to anchor the product to the wall, please continue to step 5.

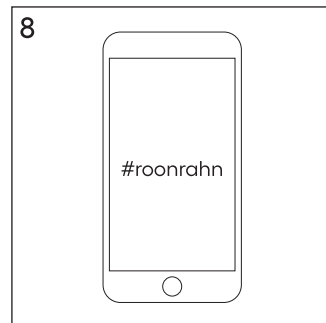

Place markings with the distance between the center of the mounting holes on the backside of the frame. The holes must be 176cm above floor height.

Drill a hole at the two marks. Insert the wall plugs and screw in the enclosed screws.

Hang your Solo™ on the screws you just installed using the hidden mounting holes on the backside.

Now you are all done and ready to enjoy! Share your Roon & Rahn products with your friends and get inspired by others.
