

Assembly guide

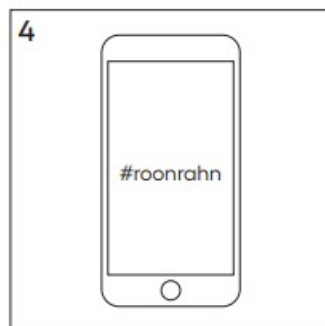

Make sure the sides are not upside down. Mount the wood poles with bushings in the top and bottom position. Fasten the small wood screws. Tighten well, without over tightening.

Mount the rest of the wood poles. Three in each acrylic recess. Use the long wood pegs.

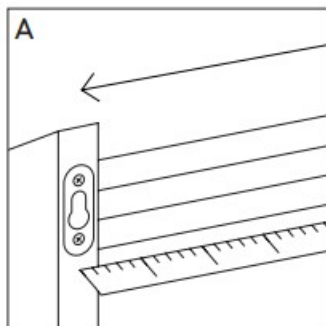

Place your Moodstand against the wall and adjust the wood poles to fit your different shoes. (Continue below for wall mount)

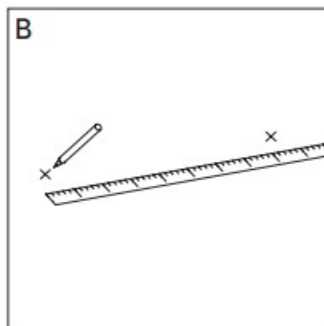

Share your brand new original Roon & Rahn product with your friend and be inspired by others.

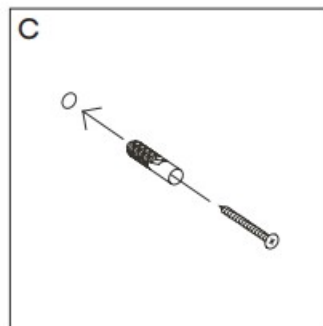

Wall mount guide

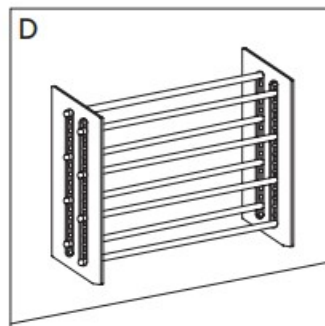

Measure the distance between the center of the wall mounts on the back of each Moodstand side.

Mark the measured distance on the wall. Make sure it is leveled.

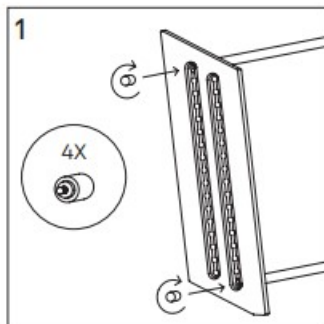

Drill a hole at the two marks. Insert the wall plugs and screw in the enclosed screws.

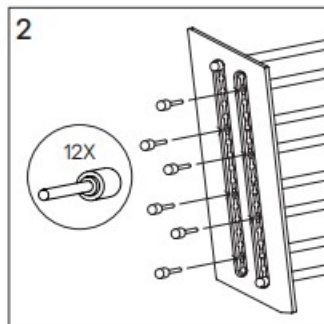

Now your Moodstand is ready to shine on the wall + easy access for vacuum cleaning :)

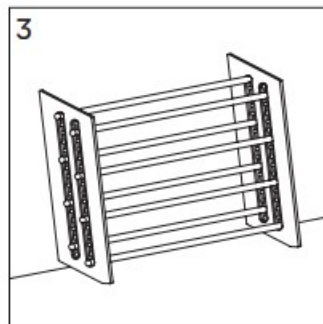

Samlevejledning

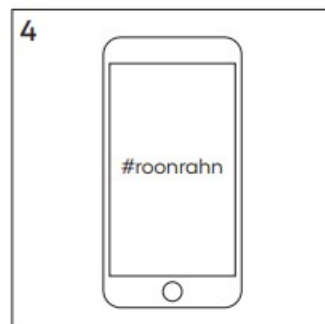

Sikr at siderne ikke vender på hovedet. Monér de to rundstokke i øverste og nederste hak i siden. Fastgør med de fire små træskruer. Spænd godt, uden at overspænde.

Monér de resterende rundstokke med magnet. Tre styk i hver akrylslidse. Sæt dem fast med de lange træpinde.

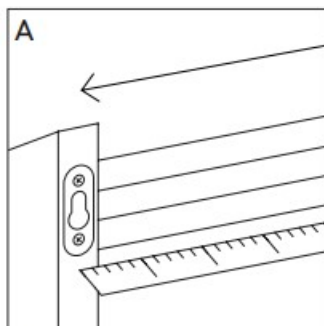

Stil dit Moodstand op ad væggen og justér højden på rundstokkene, så de passer til dine sko. (For vægmontering se nedenstående guide)

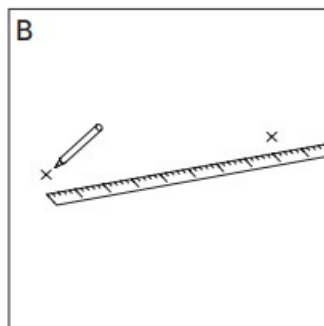

Del dit nye originale Roon & Rahn produkt med dine venner, og bliv samtidig inspireret af andre.

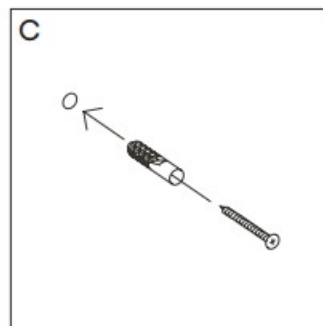

Guide til vægmontering

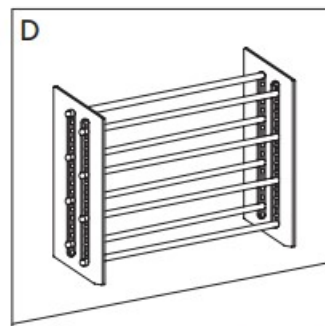

Mål afstanden mellem centrum af de to vægbeslag i hver Moodstand side.

Markér målt afstand på væggen. Sørg for at punkterne er i vater.

Bor hul ved de to markeringer. Indsæt rawplugs i de borede huller. Skru vedlagte skruer i væggen.

Dit Moodstand er nu klar til at pryde væggen + at det nu er nemmere at komme til med støvsugeren :)
