PRODUCT TIMELINE

Søren Andersen, CCO & Partner

*"At We Do Wood we are
all about walking the
talk."*

Klaus Jorlet, CEO & Partner

THIS IS WE DO WOOD

We Do Wood was founded in Copenhagen in 2011 with an ambition to unite Danish furniture manufacturing and strict sustainable principles. Today, more than 10 years later We Do Wood still strives to put the words of this ambition into practice by strictly following the highest quality standards when it comes to the selection of suppliers, materials and furniture manufacturers.

We do not have ambitions of turning the industry upside-down. But we would like to contribute to the agenda of a new era within sustainability. Our ambition is to create quality furniture that is both honest in function and expression. And as a result; We Do Wood now has a production free from any leftover materials or chemicals. We have a wish of always finding a sustainable alternative, and believe that we all carry a responsibility for the next generation.

WE DO CARE

At We Do Wood we strive to follow the guidelines of the Global Sustainable Development Goals stated by the United Nations. In practice we do take care where ever and when ever possible focusing on the 3 pillars of Sustainable Development: Social, Economic and Environmental Development.

WE DO ACT

We advocate for circular economy and strive to live up to the standards that define the principle. For We Do Wood the five pillars we follow are: local production, no chemicals, no waste, upcycling and recycling.

We hope you will join us,

Klaus Jorlet & Søren Andersen

WE DO CARE

Social development

Social responsibility

We care about people in need, and therefore we are a member of the businessgroup of Red Cross Denmark. Being a member of the group we ensure that Red Cross can keep its promise to always be present for people in need – both in Denmark and around the world when disasters arises.

Charity

We care deeply about particularly vulnerable people. Therefore we have several times supported the pediatric ward on the hospital of Aarhus. Furthermore we have several times donated products for a Christmas auction made by Lauritz.com, to support and help Danner, a Danish crisis center for women and kids.

Education

We find it important that everybody gets a chance to educate and develop their skills. Therefore we internally at We Do Wood seek extra knowledge and further education in important areas that can support our company. Furthermore we like to support young people with their education, and therefore we always have one or two internals associated with us.

Environment

Life on land

It is very important to We Do Wood to contribute to maintaining and restoring the ecosystem. Therefore we are registred FSC® partner, as well as registred Tree Nation partner. By supporting these organisations we are reforesting the world to fight climate change.

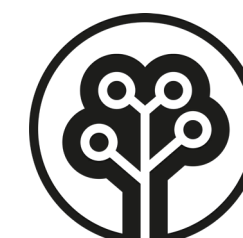

Furthermore we are a member of the danish landscape protection organisation, Danmarks Naturfredningsforening. By being a member we ensure the protection of beautiful and special landscapes, the environment, wildlife and nature in Denmark.

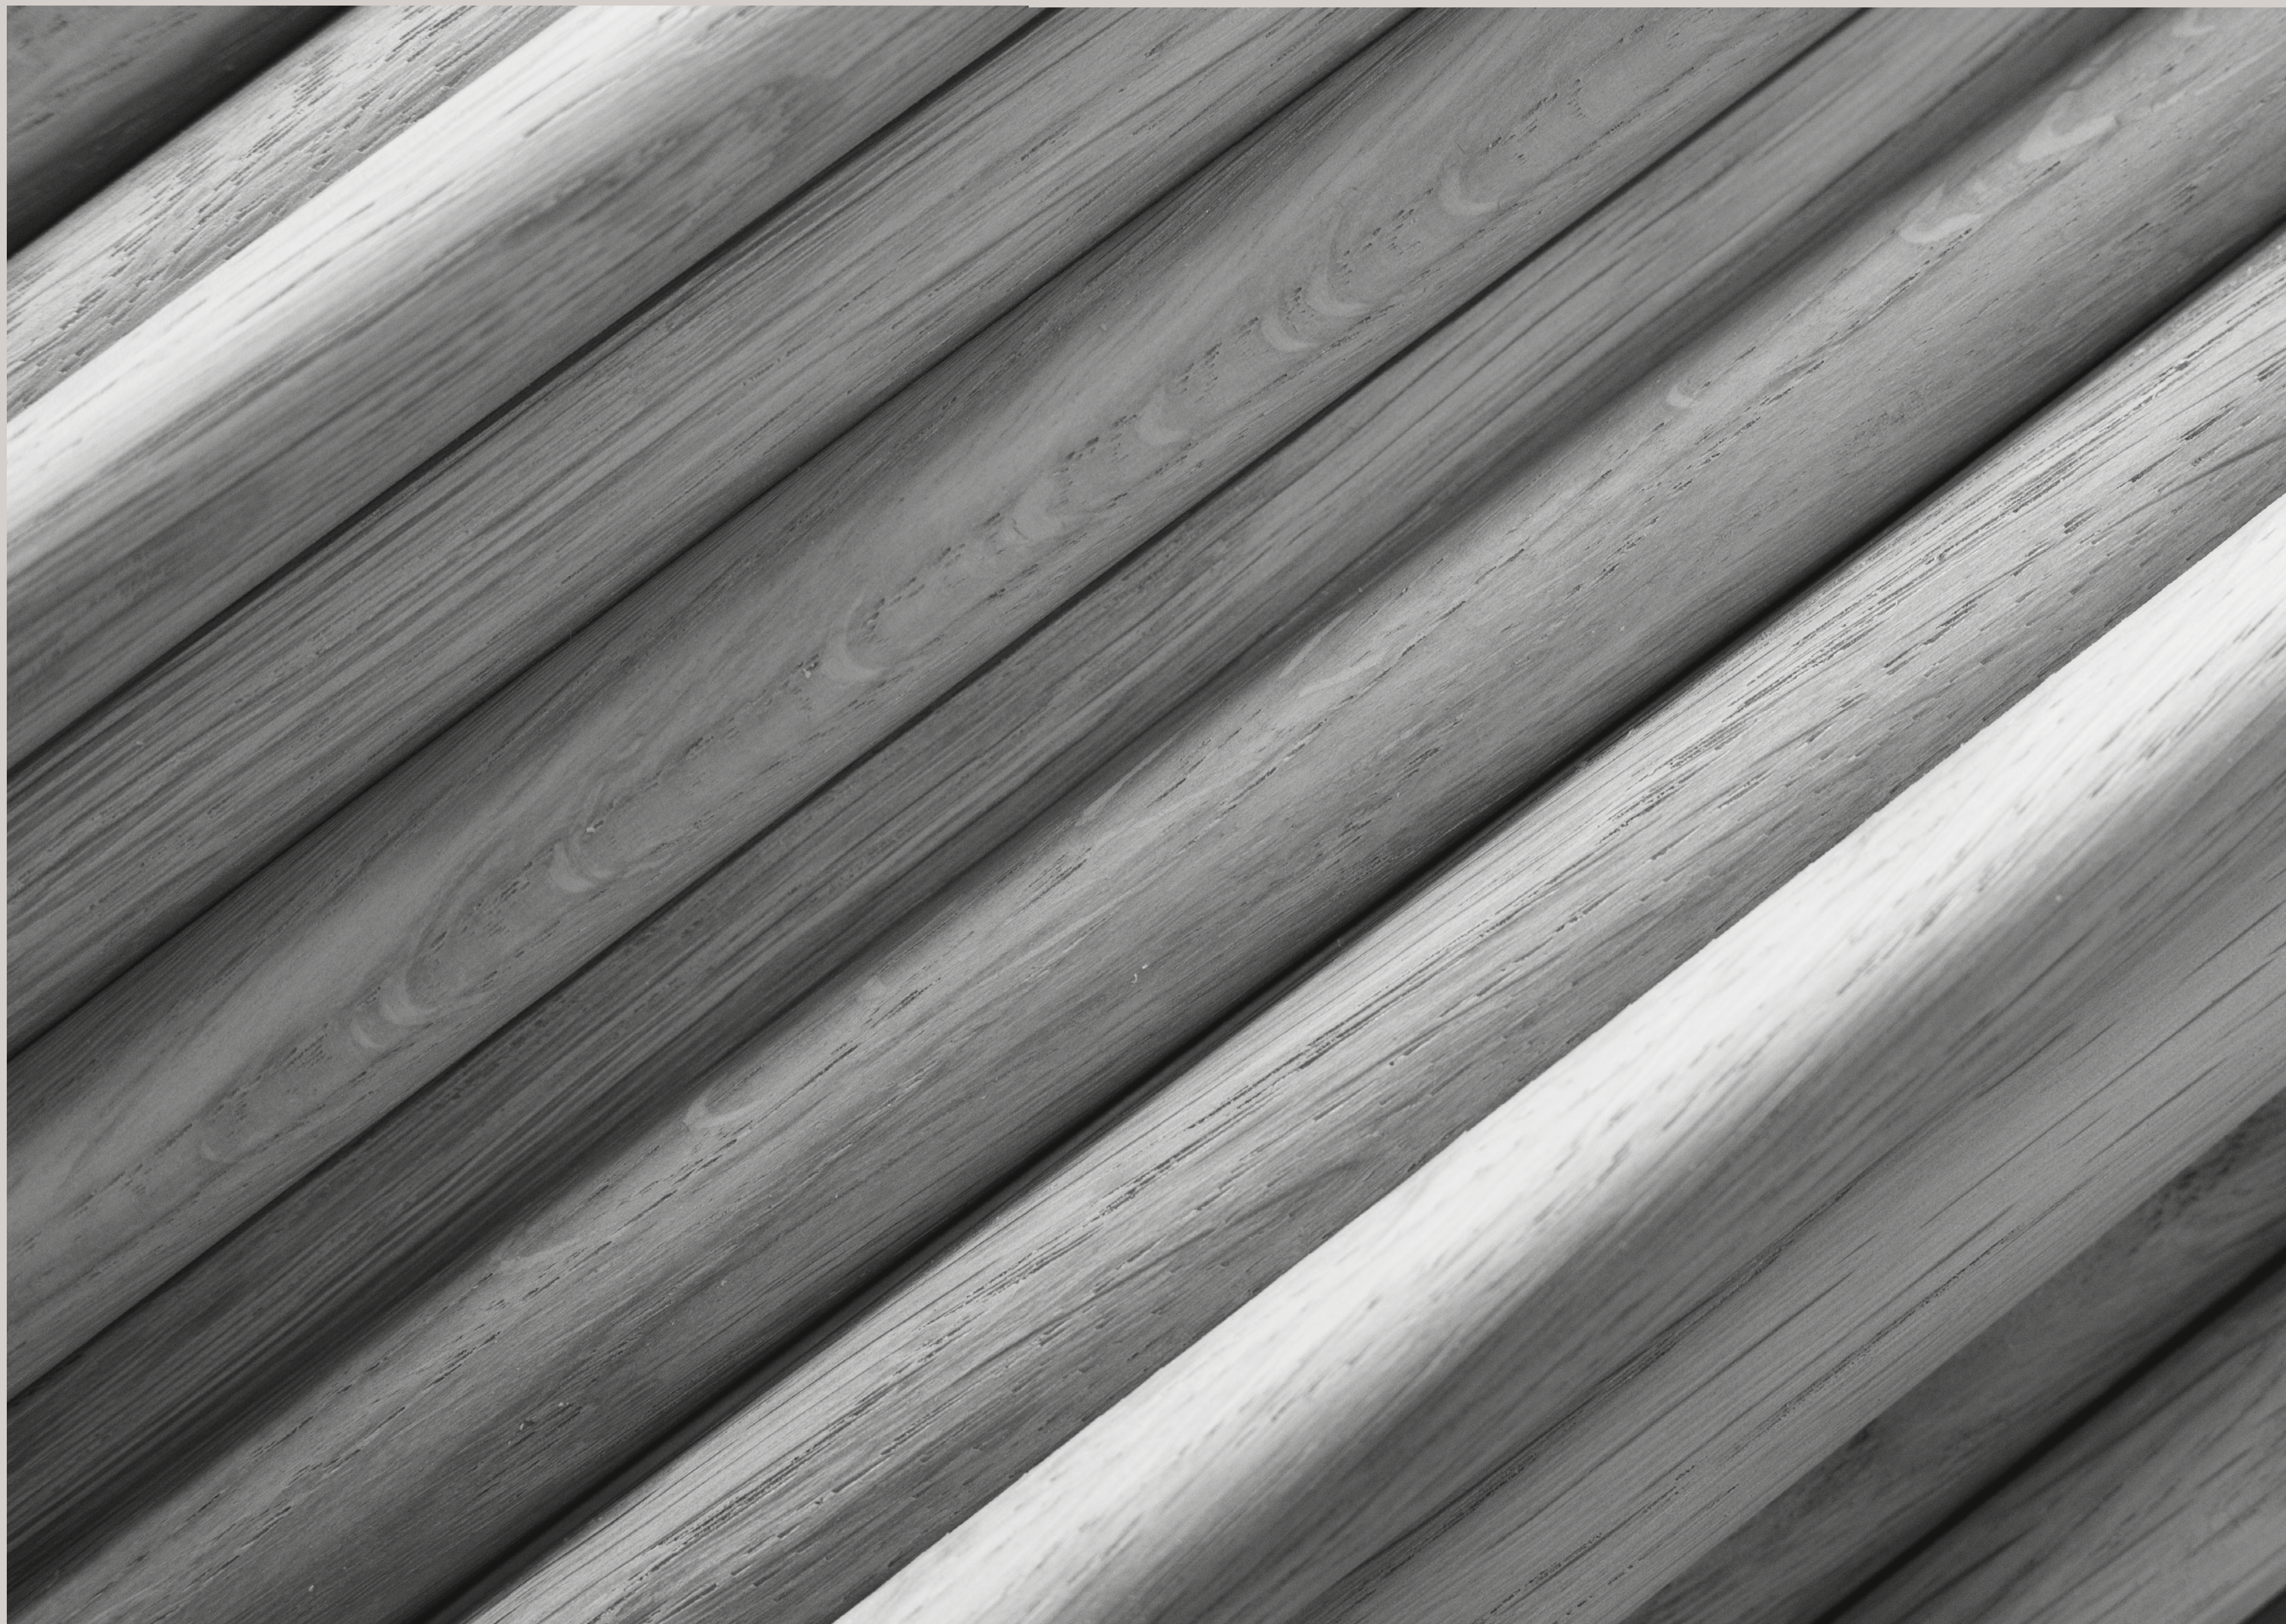

Social Sustainability

By supporting climate responsible organisations we also help creating jobs, support local communities and protect biodiversity.

Responsible suppliers

It is important to We Do Wood to have a holistic focus. Therefore we only use certified suppliers who has a social responsible focus creating jobs and taking care of the wellbeing of the workers from the local communities.

WE DO ACT

Our ambition is to create quality furniture that is both honest in function and expression. Therefore we advocate for circular economy and strive to live up to the standards that define the concept.

For We Do Wood the five pillars we follow of Circular Economy are: local production, no chemicals, no waste, upcycling and recycling.

Made in Denmark

We do not only design our products in Denmark but we also produce our products locally in Denmark, to ensure high production standards and to support and ensure job at local companies.

The local manufacturer that is producing the furniture of We Do Wood:

- Is FSC® certified partner
- Uses renewable energy
- Produces our furniture without chemicals
- Ensures to incorporate leftovers in new products

Sustainable Furniture

To create sustainable furniture we use residual materials, and environmentally friendly materials. We Do Wood is certified FSC® C138925 / GFA-COC-003142-BK, and we only use FSC® certified suppliers for the delivery of materials to our products in wood.

To improve the environmental sustainability and to reduce the carbon footprint all products are flatpacked and free from chemicals. We use formaldehyde-free glue, choose water-based paint or even avoiding using paint by implementing other techniques such as carbonisation and oxidation. Our final products are chemical-, pesticide-, herbicide- and fertilizer-free.

The Upcycle

The Upcycle is an Aarhus-based B2B material exchange platform. The company was founded with an ambition to create an advanced overview of every surplus material in the industry and production sectors. As a member of the platform we gain easy access to other companies surplus materials and collaborations are effortlessly achieved.

The Upcycling Forum

The Upcycling Forum is a network of companies that promote sustainable development by working together. They believe that by bringing production companies, creative companies and trading companies into a united forum, the untapped resources in the form of residual and surplus materials will be more available and create unique upcycling solutions.

THE
UPCYCL

“We don’t see the concept of sustainability as a passing phase, we view it as our very foundation. Ethics and aesthetics must go hand in hand.”

OUR COLLECTION

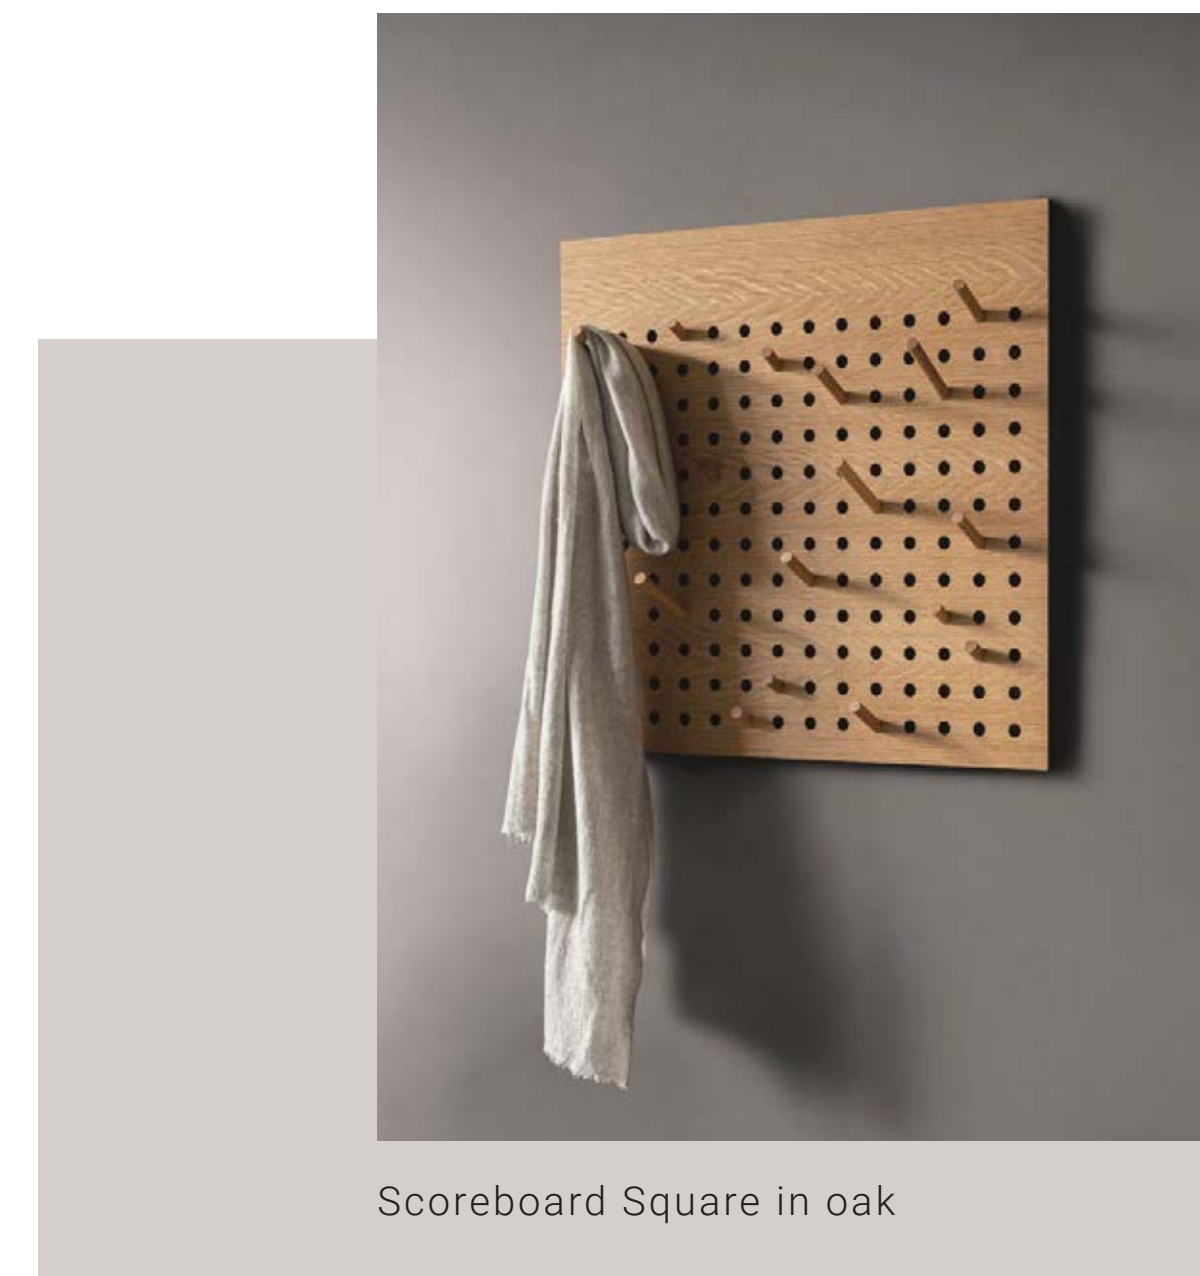

Scoreboard Large Vertical and Scoreboard Small Horizontal in oak.

SCOREBOARD COLLECTION

*Designed by
Sebastian Jørgensen*

With its countless combination possibilities, the Scoreboard offers you a functional coat rack for you to personalise by giving it an expression of your particular preference. It was designed to give a graphical feel to the traditional coat rack and moreover, it provides you with a unique way to store as well as showcase your favourite items.

The Scoreboard offers 12 pegs (18 pegs Scoreboard Square).

Scoreboard Square in oak

Scoreboard Large Vertical, Scoreboard Large Horizontal and Scoreboard Small Vertical in moso bamboo.
Eco Dots: Mix of Nature 12 pcs made of recycled plast, nordic pine and biobased color

ECO DOTS

The Scoreboard series can be combined with the Eco Dots in five different earth toned colors, giving you the freedom to mix colors into your home. They are designed with the vision of using recycled materials by bringing life and new meaning to exsisting ressources - because material matters!

The aim is to contribute to the elimination of plastic waste by redefining it. Thats why Eco Dots are made of renewable materials as upcycling plastic added wood granulate and biobased color.

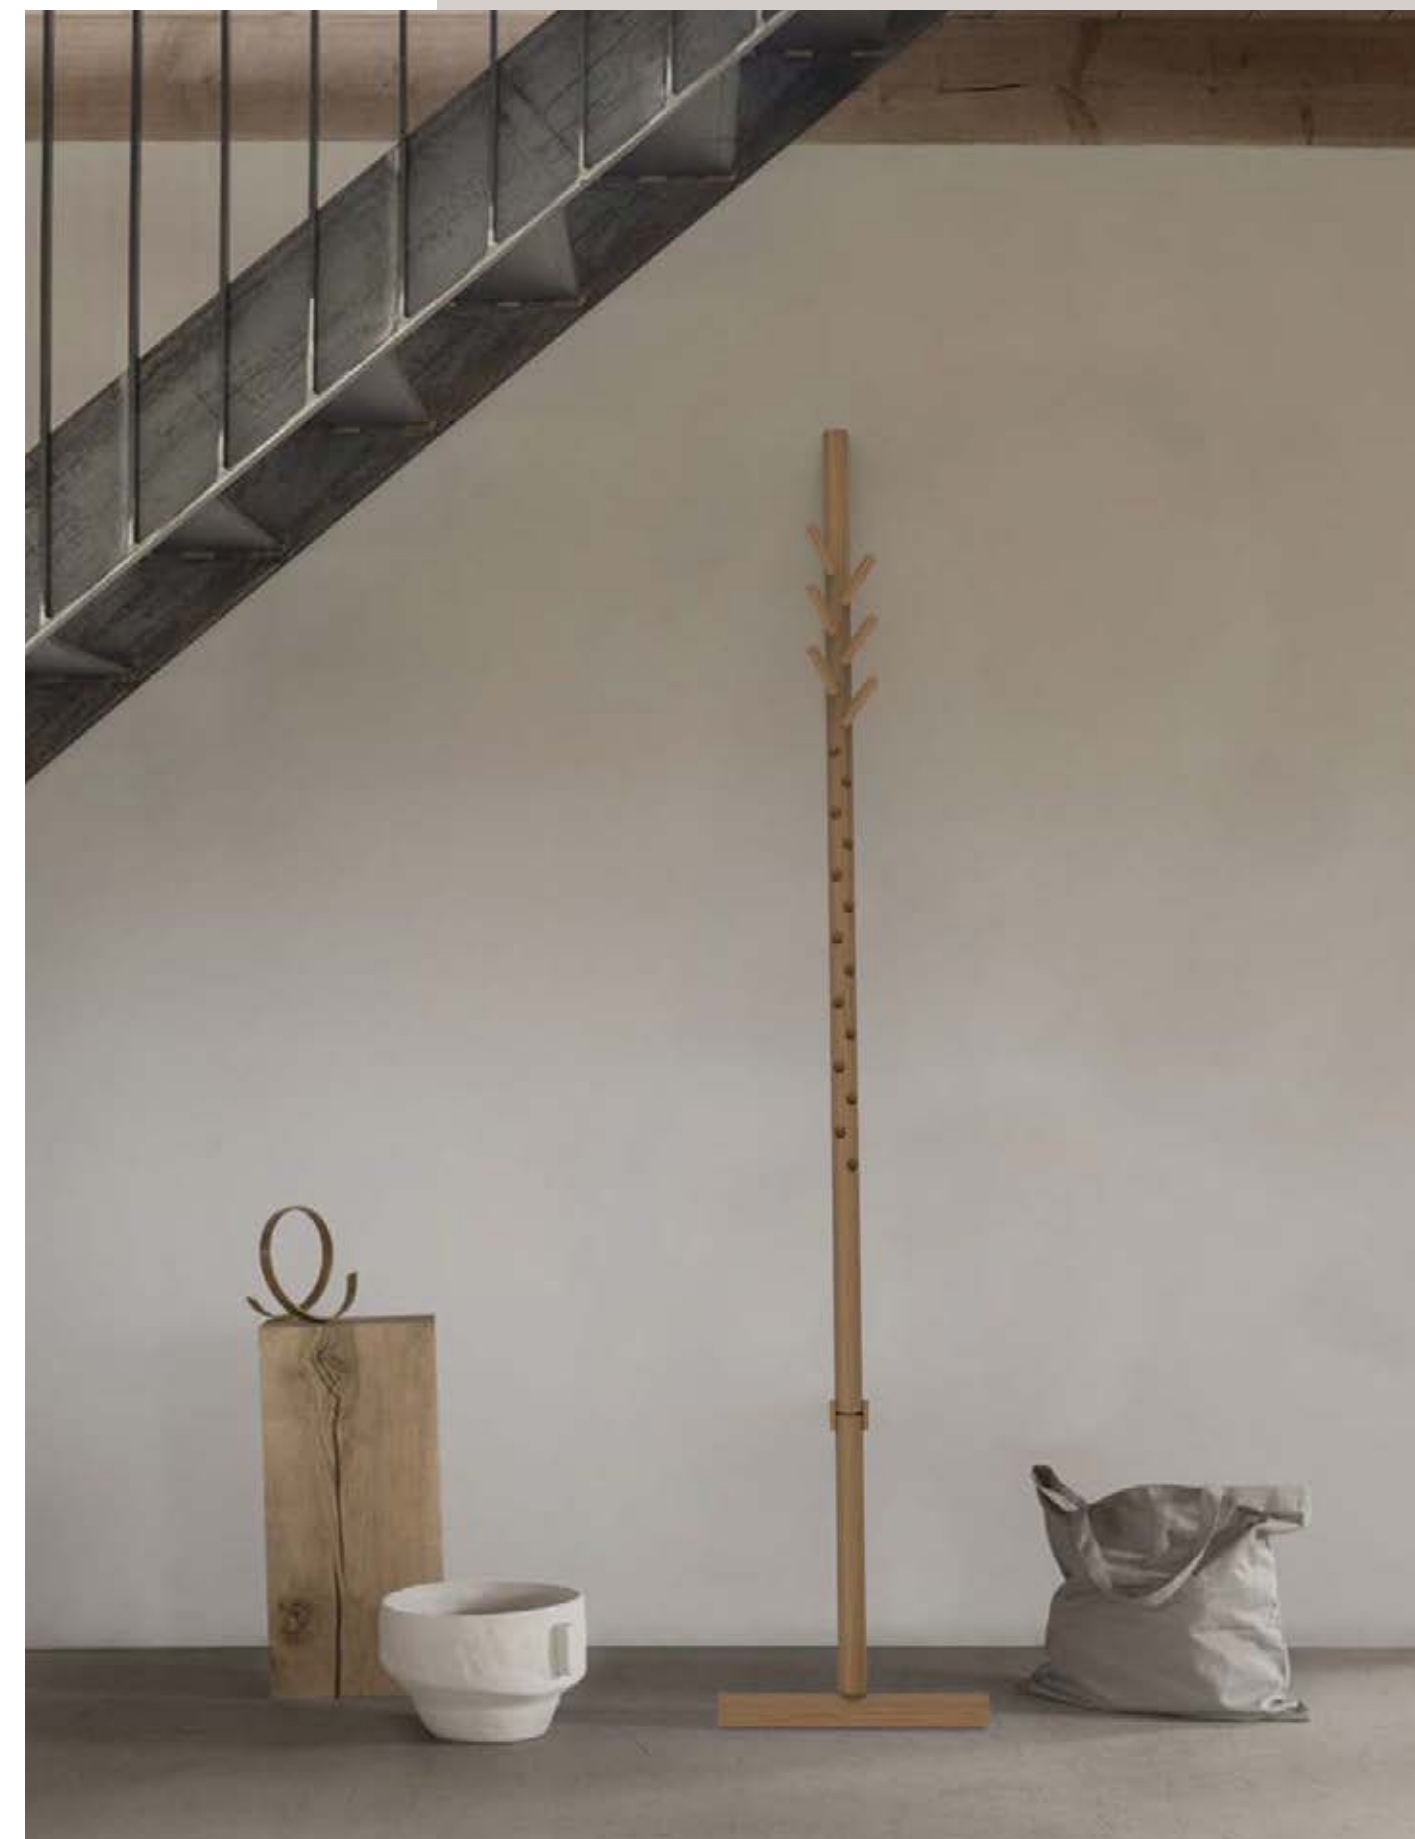

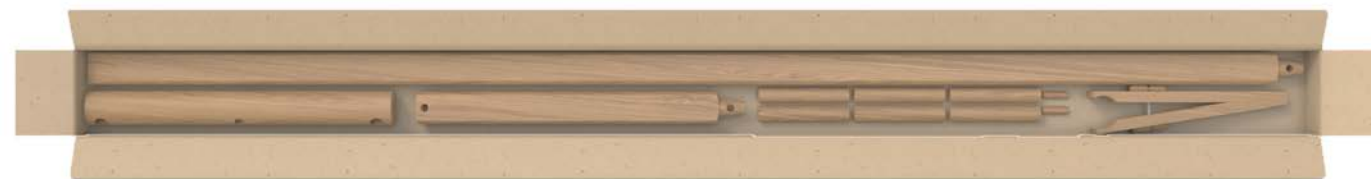

Recycled plast, nordic pine and biobased sand color.

LAID BACK

*Designed by
Friends of Wood*

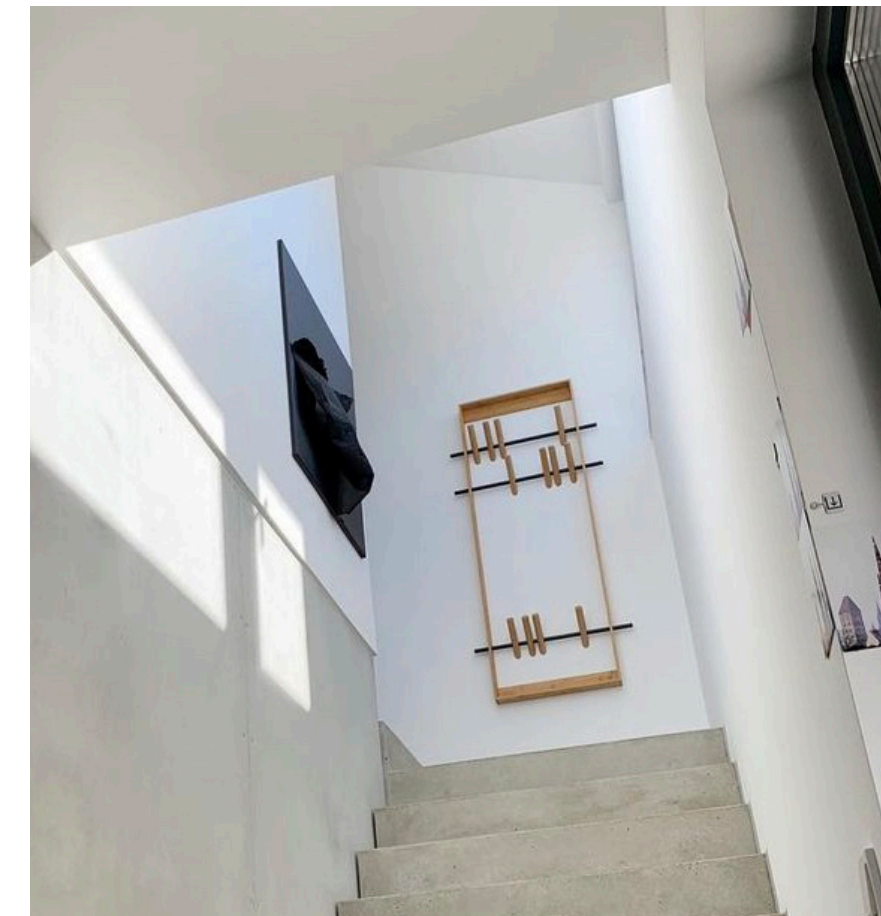

Laid Back is a product made for “The next generation”. The Coat Stand is not only a beautiful and functional piece but has a unique feature on the backside where you can measure your kids and write their height and year!

Laid Back in oak.

Coat Frame in smoked oak and brass mounting brackets.

Coat Frame in oak and black mounting brackets.

COAT FRAME

*Designed by
Sebastian Jørgensen*

With a beautiful visual framework and three adjustable hangers, the Coat Frame is perfect for the modern family. The coat hooks are mounted on three metal bars, and can be adjusted both sideways and in height. The frame serves as a mounting system for both jackets, scarfs and so on and provides an aesthetic storage solution.

Copenhanger in oak.

COPENHANGER

*Designed by
Lise Vilslev*

Copenhanger is a coat rack hanging from the ceiling, and it comes with 2 meters of natural tanned 5 mm leather cord. When you place jackets, scarfs etc. on the hanger it creates a perfect balance.

We would like to take packaging a step further, and therefor we have chosen to use the biodegradable & CO2 neutral eelgrass as package filling. Eelgrass can be used as fertilizer in your garden.

OAK

OAK BLACK

Shoe Rack in oak and black mounting brackets.

SHOE RACK / SHOE RACK SMALL

*Designed by
Sebastian Jørgensen*

Being small and simple yet very elegant, the Shoe Rack fits into any home. The Shoe Rack is made from sustainable materials and designed to accommodate different types and sizes of shoes making it very user-friendly and easy to adjust. The brackets are available in brass and black steel – materials that are easily recycled when the item reaches its end of life.

Shoe Rack Small in oak and brass.

Shoe Rack Small in oak and black mounting brackets.

Correlaton Bench Small in oak.

CORRELATION BENCH

*Designed by
Sebastian Jørgensen*

Aesthetics and functionality must go hand in hand. The Correlations Bench will fit beautifully into any narrow hallway, bedroom or living room. With its multiple functions serving both as a bench as well as for stowing away your essentials, the Correlation Bench is a rediscovered Scandinavian classic that simply invites you to take a seat.

Correlation Bench in oak with Correlation Link in steel.

SOLID HOOK

2 / 3 / 4

*Designed by
Michael Sebber Colfelt*

Solid Hook is a unique coat hanger that you can use to decorate your home. It is designed to be used in countless, interacting ways. You can choose to use a single Solid Hook or combine the different sizes of Solid Hooks.

Solid Hook 2 and Solid Hook 4 in oak.

FIELD DESK

*Designed by
Sebastian Jørgensen*

Occupying very little space while being an aesthetic and functional piece of furniture, the Field Desk is a perfect fit for the minimalistic and modern style home. In addition to serving as a workstation, the Field Desk was designed for showcasing as well as storing. Due to its specially designed brackets, the table can easily be disassembled when needed.

Field Desk in oak and brass.

Loop Desk in oak and brass.

LOOP DESK

*Designed by
Michael Sebber Colfelt*

With a wish to change the traditional perception of the home office, we have created the Loop Desk. The Loop Desk is a foldable desk that can be folded both upwards and downwards depending on your needs and the amount of space in the room. The desk is made from oak and brass, which combined with its stunning details give it a Nordic feel and making it a stylish addition to any room.

The Loop Desk has won the IF Design Award 2022 for its unique design.

Loop Shelf in oak and black mounting bracket.

LOOP SHELF

*Designed by
Sebastian Jørgensen*

With a reshaping of a traditional shelf, the Loop Shelf offers both new form and function. The Loop Shelf is a highly flexible and modular shelving system where shelves can be used individually or combined to create a complete shelving solution. With its specially designed loop-shaped brackets mounted directly onto the shelf, the Loop Shelf is a light and yet exceptionally strong piece of furniture.

Loop Shelf in smoked oak and brass.

Fivesquare in oak.

FIVESQUARE / FOURSQUARE / THREESQUARE

*Designed by
Sebastian Jørgensen*

Providing an aesthetic storage and showcasing of your preferred objects, the series of wall-mounted rack of shelves is a slim and elegant addition to your minimalistic and modern style home. The shelves come in three different sizes; Fivesquare, Foursquare and Threesquare.

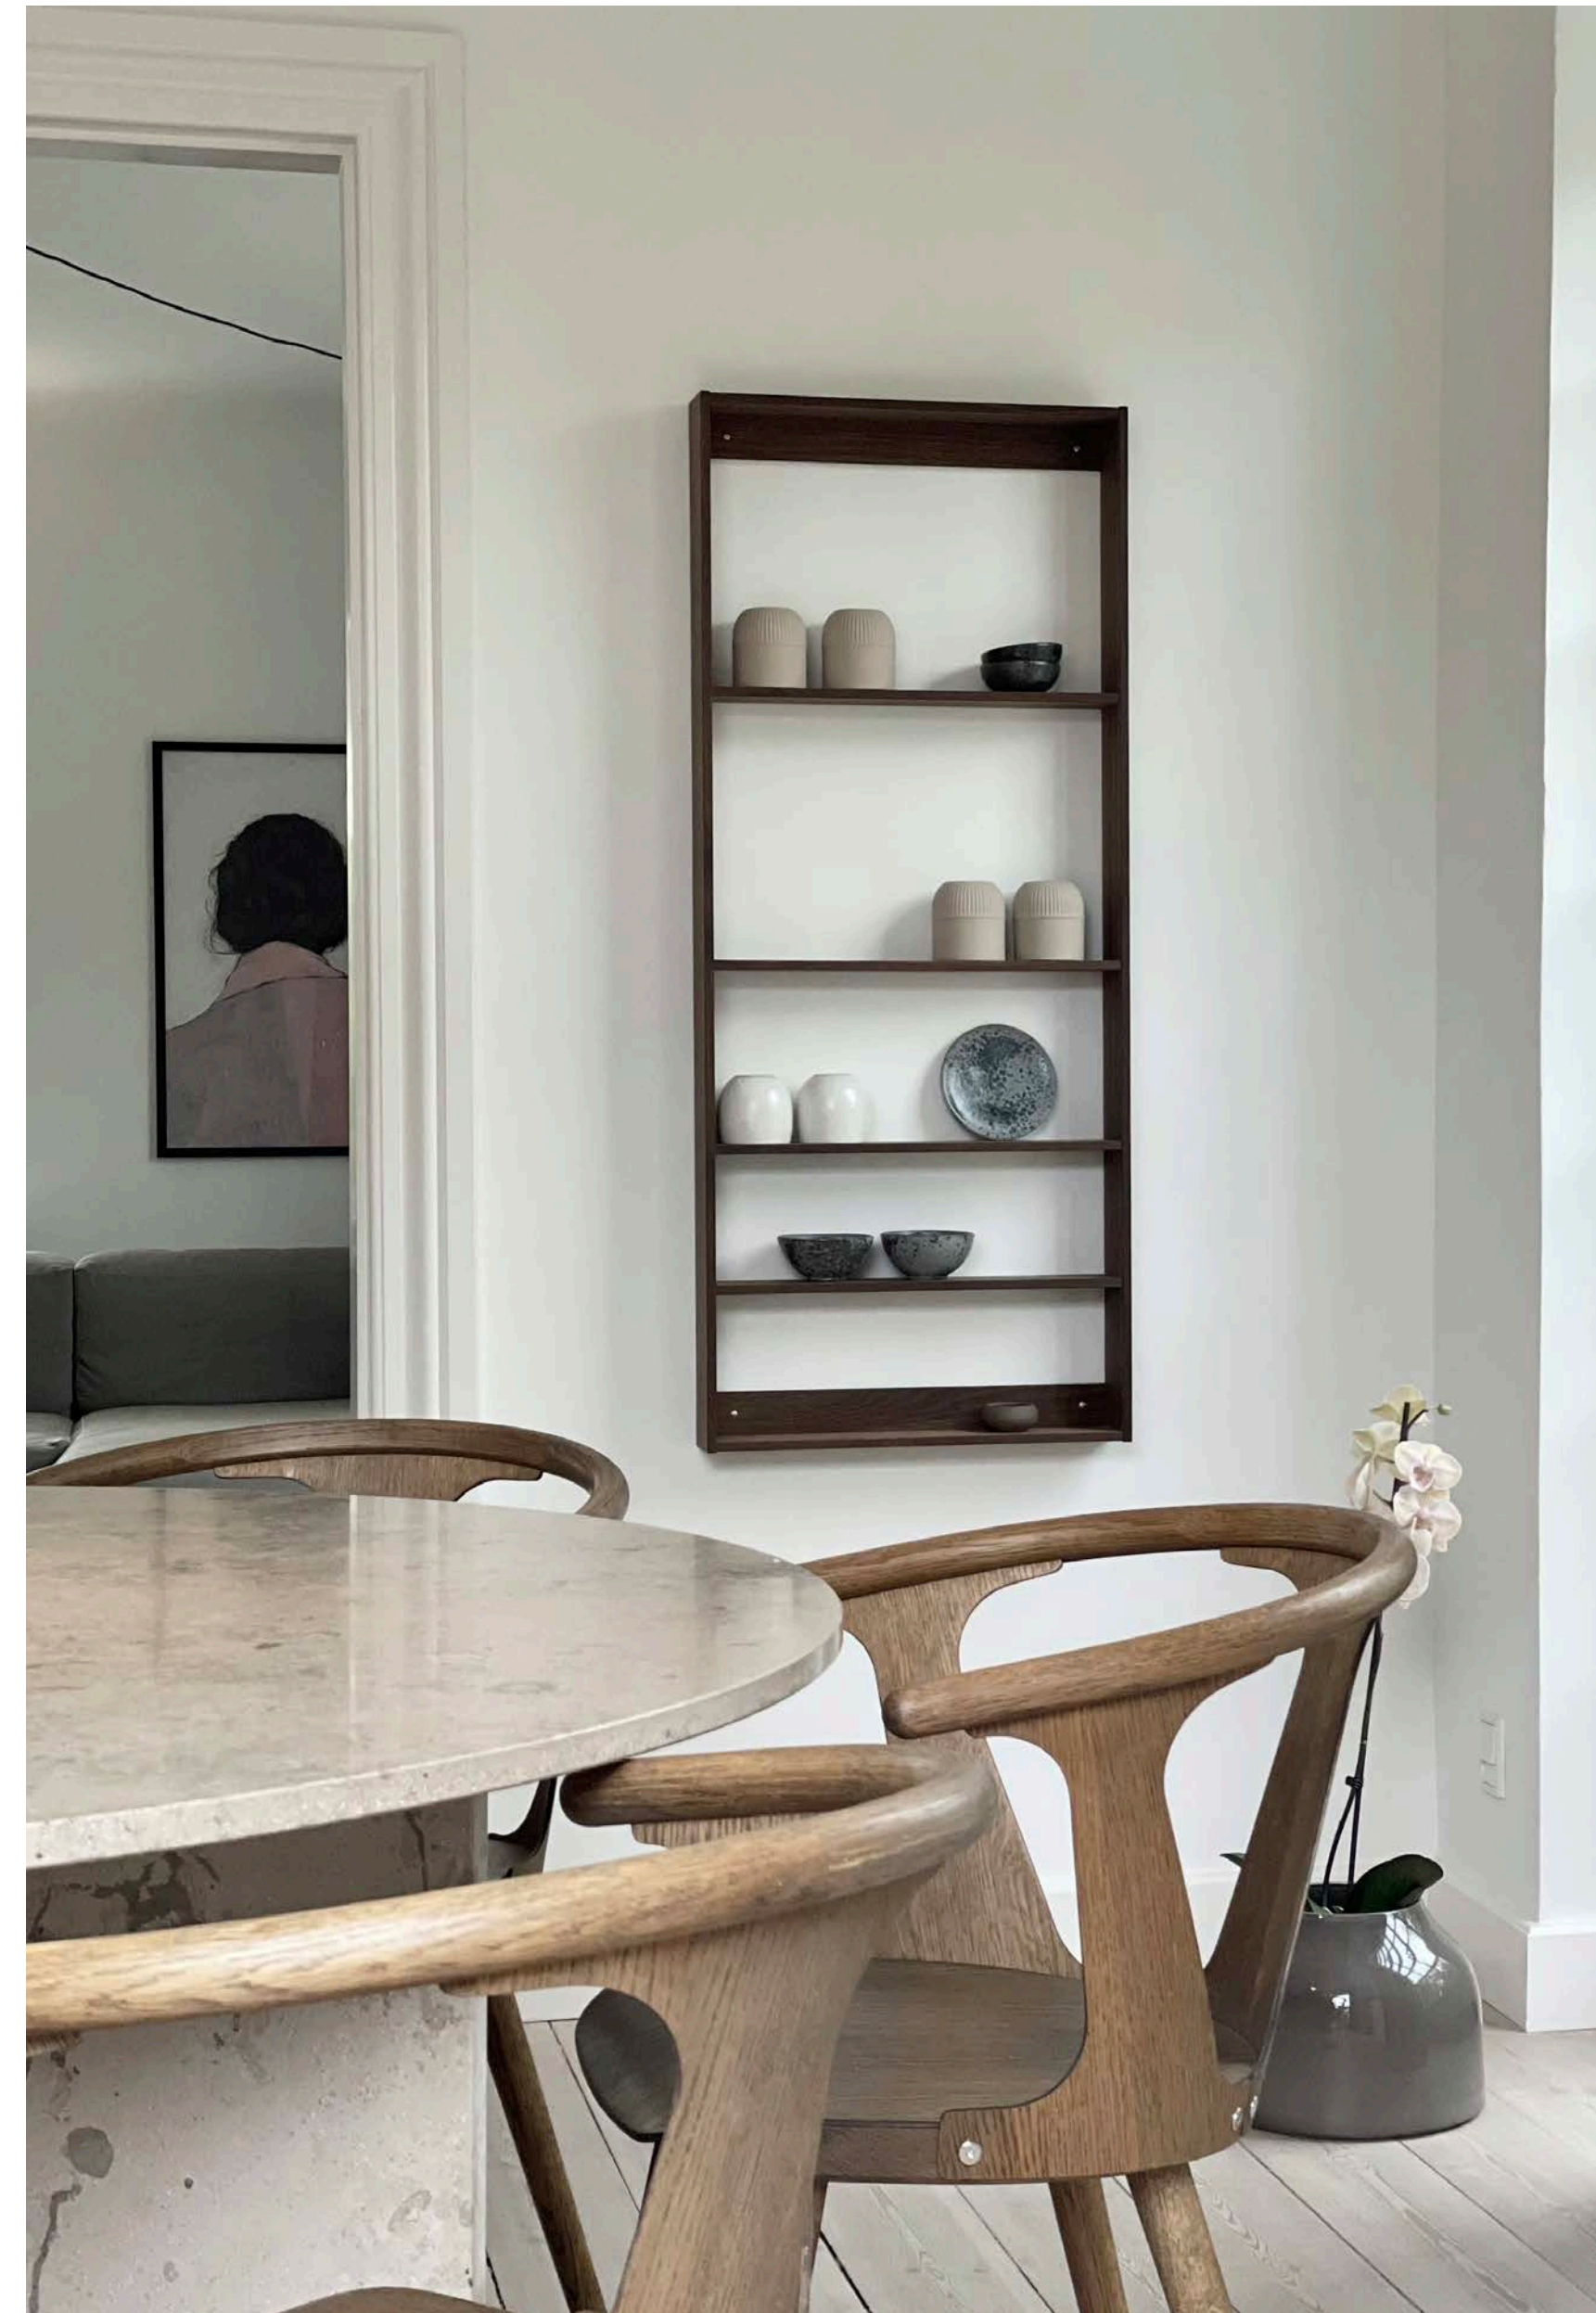

The squares are easily mounted and with a narrow shelf depth of no more than 85 mm they take up very little space.

Foursquare in oak.

Threesquare in oak.

Fivesquare in smoked oak.

SJ BOOKCASE

*Designed by
Sebastian Jørgensen*

The SJ Bookcase is a redefinition of the traditional bookcase and a statement design that would decorate any room, and even more so when displaying your personally preferred items. Its three shelves are moveable enabling you to rearrange them over time and hereby give them a new expression over and over again.

SJ Bookcase with the Mounting bar in oak.

NOMAD CHAIR

*Designed by
Sebastian Jørgensen*

The Nomad Chair is a rediscovered Scandinavian furniture classic. It was originally inspired by the legendary Rookhee Chair, which was made for British military officers stationed in India. Later on, the Scandinavian designers, Kaare Klint and Arne Norell, rethought the chair giving us the highly aesthetical and modern looking Nomad Chair.

Being true to its origins, the Nomad Chair is a field chair that can be assembled or disassembled in a matter of seconds making it highly portable and perfect for the modern-day nomadic lifestyle.

Nomad Chair in oak, canvas and leather.

FRAMED MIRROR

*Designed by
Jonas Højgaard*

Bring lightness and ease into the home, by using the simple and soft lines from the Framed Mirror. With its minimalistic and clean-lined oak frame it fits in perfectly with any Nordic design styling. Combine it with the elegant pieces from the Solid Hooks series, in which there are countless combinations.

Framed Mirror in oak and powder coated brackets and Solid Hook 3 in oak.

Framed Hanger in oak and powder coated brackets.

FRAMED HANGER

*Designed by
Jonas Højgaard*

With a clear reference to its name, the Framed Hanger's design is a clash between fashion, interior and photography. A practical and decorative way to put out clothes for tomorrow or simply just to showcase exceptional pieces of clothing. Needless to say, the clothes rack creates an elegant balance between functional storage, Nordic aesthetics and sustainable materials.

GEO'S TABLE & LILLY'S CHAIR

*Designed by
Sebastian Jørgensen*

Geo's table is seen elegantly displayed together with Lilly's chair. The table and chair suits each other beautifully, and are designed as elegant, timeless and functional pieces of furniture that can easily be placed in any children's room. Moreover, Geo's table has a large pull-out drawer that can be pulled out from both sides of the table, perfect for stashing paper, crayons and other toys.

Geo's Table and Lilly's Chair in oak.

SONO AMBRA / PHONE

*Designed by
Hans Sandgren Jakobsen*

The light and elegant design makes the SONO AMBRA™ much more than just a speaker for phones and tablets. The beautiful lines make it a timeless piece of functional design.

No cables, no plugs, no electricity needed. Just place your phone or tablet in the SONO AMBRA™ speaker, press play on your device and your music will be naturally amplified.

SONO AMBRA / TABLET

*Designed by
Hans Sandgren Jakobsen*

Use the SONO AMBRA™ speaker to play your music everywhere: in your kitchen, living room, bedroom, bathroom, the office, the boat, the summerhouse, on your porch or bring it to the beach.

The SONO AMBRA™ speaker works with various models from brands like Apple, Samsung, Huawei, Nexus, HTC and many more.

*"Our choices today are reflected in our tomorrow.
The possibilities are endless when it comes to
a more sustainable and innovative way of doing
furniture. We hope to inspire when seeking the
better alternative."*

OUR DESIGNERS

"A piece of furniture is a succes when it invites you to use it and does not require too much explanation."

Sebastian Jørgensen
Designer

A small, practical and simply designed chair (Lilly's chair) built for Sebastian Jørgensen's daughter became the begining of We Do Wood.

The consistent approach is that functionality must be the key, and that the product must be able to fit smoothly into people's everyday lives. The main thing is to create furniture that is honest in both its actual function and its visual expression.

"Good furniture must quite simply stand there and invite you to use it"

Portrait: Sebastian Jørgensen

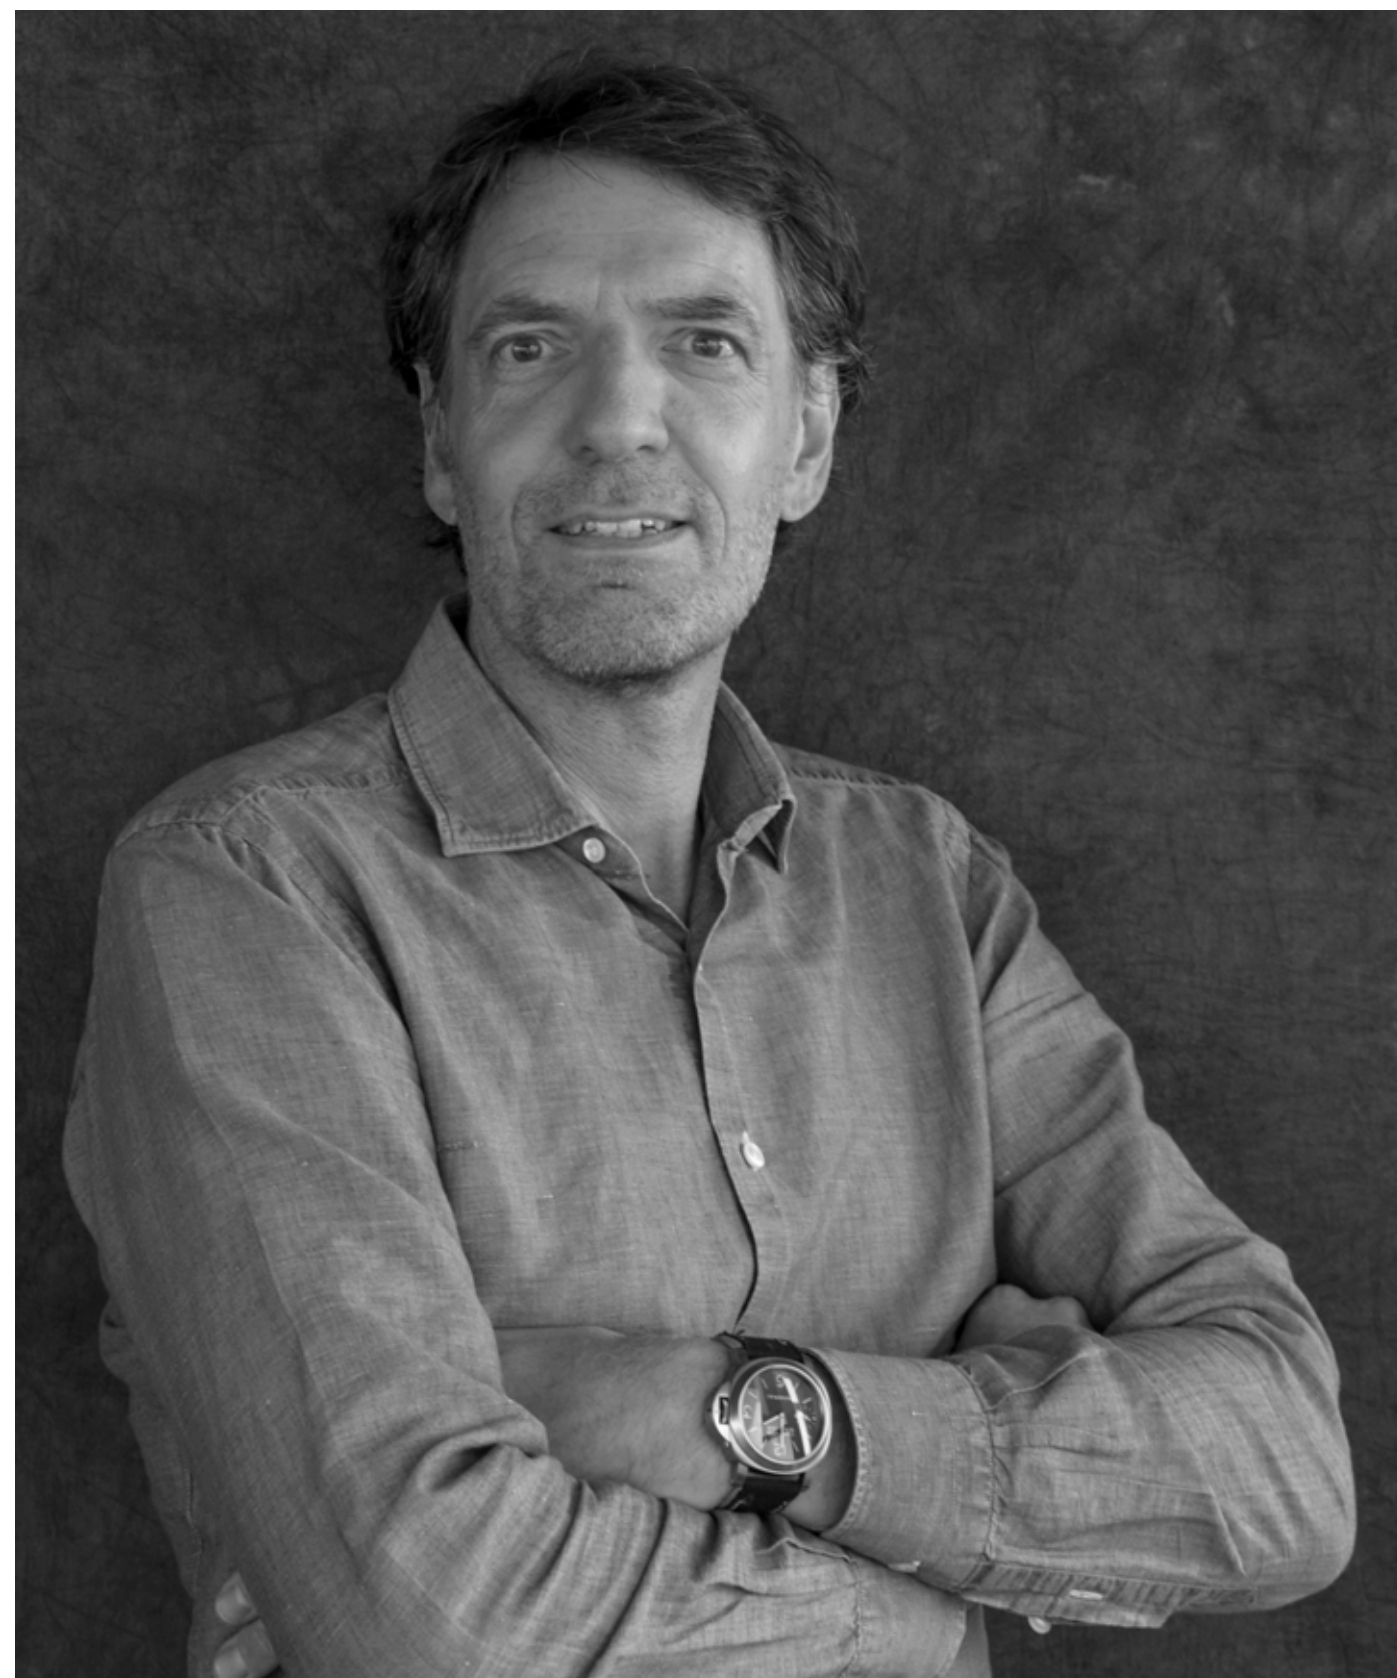

Portrait: Jonas Højgaard

*"I believe that great design is complete,
when you cannot remove anymore from it"*

*Jonas Højgaard
Designer*

Scandinavian design are often labelled as being minimalistic. Jonas Højgaard believes that this holds some truth, but it is not the whole story.

Jonas strongly believe that "the path of least resistance" collides with what we in general perceive as great minimalistic design. It is a concept derived from nature, where resources are scars and efficiency is key. He believes that great design is complete, when you cannot remove anymore from it.

Portrait: Michael Sebber Colfelt

*"I seek beauty in the simple shape itself,
a detail or in the function"*

*Michael Sebber Colfelt
Designer*

Michael is highly experienced and an Award winning Senior Product Designer with a demonstrated history of working in the international design, architecture & planning industry.

He is primarily working within the fields of Product Design, Furniture Design, Lighting Design, Interior Design, Interface Design and Concept Development.

Michael holds a Masters degree from The Royal Danish Academy of Art focused on Architecture and Industrial Design. He has held a position as external examiner at The Royal Danish Academy of Arts and have received a grant from Statens Kunstfond / The Danish Arts Foundation.

During the design process good ergonomics and sustainability alike are important issues in his search for the best possible result.

"Innovation and aesthetics are equal values and the goal is always to end up with a product that appears in its own right"

*Hans Sandgren Jakobsen
Designer*

The Scandinavian, minimalistic & highly functional design of SONO AMBRA™ is made by the danish furniture designer Hans Sandgren Jakobsen.

Working with design Hans Sandgren finds it important to add innovation, aestestics and functionality into both new and existing design. Hans believes that a piece of furniture only consists of the essential materials which will make it appear clean and simple.

Hans Sandgren Jakobsen, who is both a trained cabinetmaker and designer, works in the intersection between drawing board and model workshop, to constantly optimizing the final shape, and to ensure optimal function.

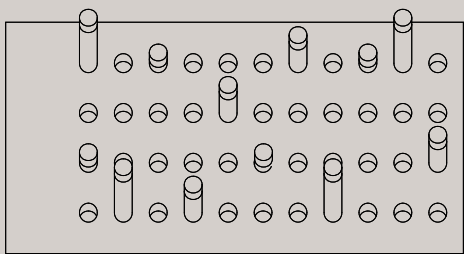

Portrait: Hans Sandgren Jakobsen

“The main thing for us is to create furniture that is honest in both its actual function and its visual expression.”
