About Hannun

Where Vision Meets Design

Located in Barcelona, at Hannun we offer a new way to connect with people's values through the conscious creation of furniture made by local quality artisans using sustainable materials and harmonious designs.

We believe that a solid design is an exercise in coherence, which is why we also collaborate with international designers who share our vision. With attention to every step of the process, we work with workshops who create each piece with a purpose.

For us, it's about redefining our relationship with the world, starting at home with conscious furniture choices that bring harmony to each space.

Timeless Quality

Quality must be the fundamental basis of sustainability. That's why we design and produce durable furniture that transcends ephemeral trends, made with certified and sustainably sourced materials.

Quality furniture provides functionality, inspires trust, and is the symbol of true commitment to customer satisfaction.

We Design together

At Hannun we also collaborate with international designers who share our philosophy: creating authentic pieces that combine design, quality of materials and respect for the environment. We offer our customers the opportunity to stand out with exclusive collections that resonate with your target audience.

Our commitment

For Hannun sustainability is a must. Customers opting for sustainable and handcrafted furniture also take a conscious step towards a better future.

Hannun is FSC certified and Bcorp company. We opt to use sustainable materials, including using innovative approaches such as reclaimed wood or recycled plastics.

Natural Beauty

Certified solid wood

Material obtained directly from the trunk. Without sawing or mixing with other substances, it is in harmony with our forests.

Less processed wood, without additional products. Easier to recycle.

Reclaimed wood

Wood with a long history behind it and a long life ahead of it. Reclaimed from old structures.

It brings us closer to the goal of zero felling and prevents it from ending up in landfill.

Cork

Lightweight, versatile and reusable material that minimizes impact and adapts to your daily life.

It is extracted locally and does not have an impact on the environment.

Microcement and ceramics

Pure and natural materials. No unnecessary mixtures or aggressive chemical treatments.

High-quality microcement with clean finishes, and ceramics created from natural materials, designed to be easily recyclable.

Natural and recycled fibers

Textiles made from natural fibres and textiles created from recycled PET bottles.

Each piece is designed to reduce the environmental impact, opting for quality materials that connect us with nature and support innovation.

Products

Clean-lined designs with balanced proportions, some crafted from solid fir wood and artisanal microcement. Simple, durable, and sustainable pieces that bring calm, character, and timeless style—naturally transforming any space into a conscious and inviting environment.
